

Conditional Sampling

Goal: learn to sample from the conditional distribution: $p(\mathbf{x} | \mathbf{y})$

This describes a general inverse problem:

“given data \mathbf{y} , which image \mathbf{x} corresponds to it?”

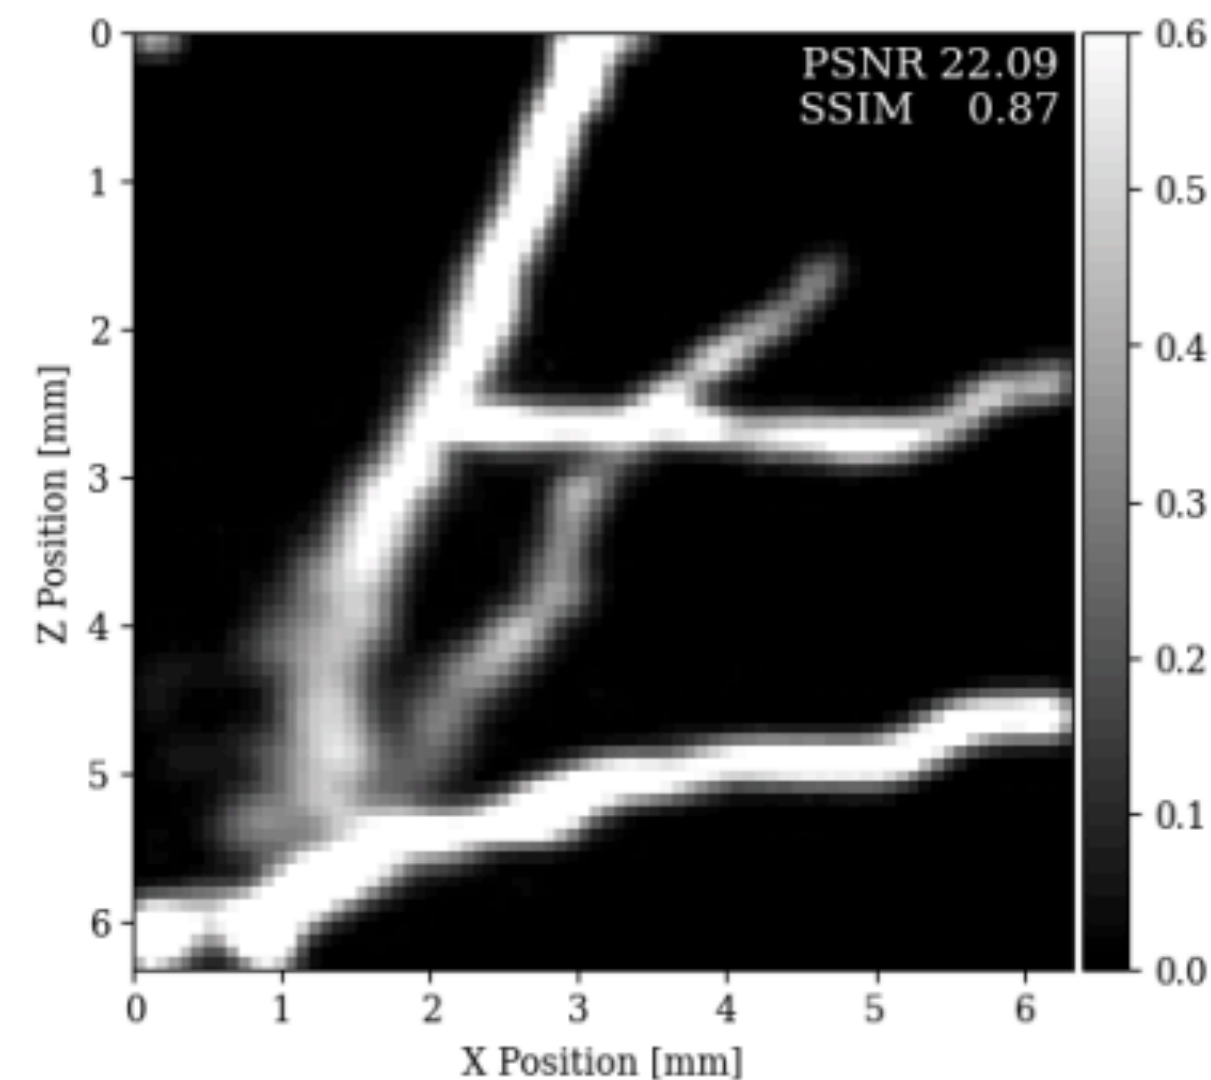

|

Conditional Sampling

Goal: learn to sample from the conditional distribution: $p(\mathbf{x} | \mathbf{y})$

This describes a general inverse problem:

“given data \mathbf{y} , which image \mathbf{x} corresponds to it?”

Invert Forward process
that gave us data
