MAP Optimization with NFs

$$\underset{\mathbf{x}}{\operatorname{argmin}} \quad \frac{1}{2}\|A\mathbf{x} - \mathbf{d}\|_2^2 + \log R(\mathbf{x})$$

Reparametrize optimization with trained generative network $\quad \mathbf{x} = G_\theta(\mathbf{z})$

Data misfit becomes $\quad \|A\mathbf{x} - \mathbf{d}\|_2 = \|AG_\theta(\mathbf{z}) - \mathbf{d}\|_2$

MAP Optimization with NFs

$$\underset{\mathbf{x}}{\operatorname{argmin}} \quad \frac{1}{2}\|A\mathbf{x} - \mathbf{d}\|_2^2 + \log R(\mathbf{x})$$

Reparametrize optimization with trained generative network $\quad \mathbf{x} = G_\theta(\mathbf{z})$

Data misfit becomes $\quad \|A\mathbf{x} - \mathbf{d}\|_2 = \|AG_\theta(\mathbf{z}) - \mathbf{d}\|_2$

Since latent $\mathbf{z}$ is gaussian the regularization is directly given $\quad \log R(\mathbf{z}) = \|\mathbf{z}\|_2$
